The Joanne T. Dempsey Memorial Lecture

Joanne T. Dempsey Memorial Lecture Series: "The Devotio Moderna: Then and Now" by Frits van Oostrom
Tues. Oct 6, 2015, 5:00 p.m. in Hahn University Center, Forum C. Reception to follow; free and open to the public.

The Department of English welcomes **Frits van Oostrom** as our speaker for the 2015-2016 Joanne T. Dempsey Memorial Lecture. One of Europe's most distinguished scholars, Prof. van Oostrom is University Professor of the Humanities at the University of Utrecht (The Netherlands). He has spoken and published widely on medieval literature and culture for both academic and popular audiences. This event is sponsored by the Joanne T. Dempsey Memorial Lecture Series, the Medieval and Renaissance Studies Program, the Frances G. Harpst Center for Catholic Thought and Culture, the Department of Philosophy, and the Department of Theology and Religious Studies.

The **Devotio Moderna**, which is today best known for its influence on Thomas à Kempis' *Imitation of Christ*, originated in the Low Countries in the 14th century as a movement for Catholic religious reform. Fundamentally, the Devotio Moderna was a highly innovative movement that advocated for a Christian life based upon the virtues of humility and simplicity. In this presentation, Frits van Oostrom will focus on three particular aspects of the Devotio Moderna --its textual culture, its focus on organisation, and its attitude towards the priesthood—and the ways that these features emerge today in contemporary culture. Each of these features displays a poignant modernity for those who, like Frits van Oostrom, believe that

history provokes us to reflect upon the present as well as the past.

One of Europe's most celebrated scholars today, **Frits van Oostrom** is Distinguished University Professor of the Humanities at the University of Utrecht, The Netherlands. Prof. van Oostrom has been the recipient of the Spinoza Prize, has held the prestigious Erasmus Chair at Harvard University, and has been a fellow of the Netherlands Institute for Advanced Study; he also served as President of the Royal Netherlands Academy of Arts and Sciences. Prof. van Oostrom's most recent book, *Wereld in Woorden—World into Words*—is a bestseller in his home country and is currently being translated into English. <http://www.sandiego.edu/cas/english/affiliations/dempsey.php>.

Job Opportunities with Environment California

The Fund for the Public Interest is a national non-profit organization that works to build support for progressive organizations across the country. They've run campaigns for USPIRG, Environment America, the Human Rights Campaign, the Sierra Club, Greenpeace, and Fair Share Alliance.

This last year their staff helped to protect the Pacific Ocean by banning single use plastic grocery bags in over 88 cities and counties across the state of California. They've also helped repeal "Don't Ask Don't Tell", and increased food safety standards to make school lunches safer.

Currently, they're working with Environment California on a campaign to pass a statewide ban on fracking. This is a dangerous form of drilling that wastes millions of gallons of water and pollutes it with toxic chemicals as well. This is something that we cannot afford in the middle of California's worst drought on record.

New York State passed a state wide ban by mobilizing public support. In order to protect our water and public health they are going to be doing the same.

As a member of their staff, you will fundraise, build membership for their partner groups, and educate and activate citizens on pressing issues. You will also have the opportunity to organize press conferences and build coalitions with other non-profit organizations. While on staff you will learn how to effectively generate public support, build upon your understanding of the political process, and create positive social change.

You can get involved by applying online at www.jobsthatmatter.org or by calling their office at 619-297-5512. Also check their website out at: <http://www.environmentcalifornia.org>. *

In his highly acclaimed book *Beyond the University* (Yale University Press, 2014), Michael S. Roth examines the history of liberal education in America from Thomas Jefferson to Richard Rorty, and argues that a broad, self-critical and pragmatic education has, since the founding of the nation, cultivated individual freedom, promulgated civic virtue, and instilled hope for the future. These themes will be explored in President Roth's address to the USD community, in which he will explain how liberal education increases our capacity to understand and reshape the world.

Michael S. Roth is president of Wesleyan University, and the author of five books, including *Psycho-Analysis as History* (Cornell University Press, 1987) and *Memory, Trauma, and History* (Columbia University Press, 2012). He teaches history, film studies, and philosophy at Wesleyan, and his humanities classes reach many thousands through his open online Coursera courses.

This roundtable conversation will reflect on the significance of October 12, traditionally known as “Columbus Day” in the United States. For the Native and many other people of the Americas, the meaning of the day is problematic, as it reinforces a contested and fictitious narrative of the “discovery” of the American continent. This panel brings together faculty across different departments from the College of Arts and Sciences to talk about the historical narratives of “discovery,” “encounter,” or even “covering the other,” a phrase coined by the philosopher Enrique Dussel. In discussing the (de) colonization processes, panelist will consider notions of modernity, development, and epistemological hierarchies in the construction of the West and the colonized other, as this day has not only shaped such categories, but it has also continued to raise controversy regarding what is acknowledged, celebrated and erased.

More than two-thirds **2/3** of people diagnosed with lung cancer have never smoked.
