Looking Beneath The Surface

African American Student Retention at the University of San Diego

Joi A. Spencer, PhD.
Raketa Ouedraogo-Thomas
Who gets the most out of college?

"On predominantly white campuses, white males benefited most on measures of cognitive growth, social participation, assertiveness, academic success, satisfaction, and general social-psychological adjustment."

-Flemmings, 1984
Activities of the Black Student Retention and Recognition Committee (BSRRC)

- Black student orientation fair
- Black student graduation (now in its 3rd year)
- Black student mentorship program
- Increased Black student Summer Bridge involvement
- Black student preceptorial course clustering
- The development and teaching of EDUC 379

Course Features: Designing to support student retention

- 1-unit research seminar
- Immersion in an African American academic community
- Required study group sessions
- Challenging readings & assignments
- Focus on writing development
- Guest speakers / role models

*Education as Freedom*
Noel Anderson & Haroon Kharem
Background & Theoretical Grounding

- Focus on access (beginning in 1960's)
- Stereotype threat (Steele, 1997 & 2010)
- From access to quality of experience
- UG Calculus Students (Fullilove & Treisman, 1990)

---

**Chinese American students:**
- studied in groups
- visited office hours
- developed an social/ academic community

**African American students:**
- studied in isolation
- avoided office hours
- academics separate from social life
Research Questions

● What is the role of EDUC 379 in the academic & social development of students?
● How do the course features (study groups, guest speakers, challenging assignments, etc.) support/shape student's first year experience?
● What is the impact of the course on student’s ideas/decisions about graduate school?

How might we:
● Develop an academic community amongst enrolled students?
● Support the development of writing for enrolled students?
Methodology

This is a mixed-method study in which the following were collected...

● Course demographics
● Pre/Post Surveys
● Running notes
● Focus groups

The Black Student Protest Movement at Rutgers
Richard P. McCormick
Findings - Course demographics

**Student Data of EDUC 379**

- Public HS: 16
- Private HS: 6
- Athlete: 11
- Transfer: 1
- Completed course: 21
## Findings - Campus Climate

</tr>
</tbody>
</table>
Themes - Running notes & focus groups

- Unique student-athlete experience
- Differences in student experiences prior to coming to USD
- Navigating the limited race-related experiences of white students
- The role of support structures in the first year experience
Unique student-athlete experience

Built-in social and academic community

● “You gravitate towards other athletes because they get your schedule and other stresses and dealing with the coach. Other non-sports friends don’t really understand.”
- Student female discussing “athletic culture”-Focus group notes, week 14.

Athlete versus Intellectual

● “The staff automatically assumes I’m an athlete. It would be nice if they thought otherwise...that I’m not necessarily here because of sports.”
● Athletes taking the course just for a grade.
- Focus group notes, Week 14.
Differences in student experiences prior to coming to USD

Students from under-resourced, inner-city high schools
  - “I can relate to those kids in the video ... The quality of our school was not like the quality of the kids in the suburban schools. We had 4 different principals in the 4 years that I was in high school. I had 7 different math teachers last year alone. So, I get here and I’m taking math and...”
  - Female student, Week 2

Differences in Black Identity and connection to the Black freedom struggle
  - Tiffany: “I don’t see myself as Black or anything. I’m just human. That’s all.”
  - Monique: “Oh my gosh, don’t you get it. It’s not just about how you see yourself, but how others see you.”
  - In-class exchange between two students
Navigating the limited race-related experiences of white students

● Female student: There are a lot of students on campus who have not been around people of color. When they see like are like naturally curious and want to ask questions, but I don’t think they know how to do it in a way that’s appropriate.

● Female Student: I’ve been asked questions like, “Oh my gosh I have never seen the texture of your hair!” and people just want to touch my hair. Or “Are all black peoples hair nappy?” Like I have had stuff like that said to me and so its just like I want to educate people on things.

- Focus group- Week 14
The role of support structures in the first year experience

- **Student:** *I know that SSS has helped me a lot. They help me with my classes. They helped me plan my schedule. If they didn’t show me the course catalog I would be lost.*

- "*My teachers are everything I wanted. Their not just like a normal professor. They are always there, like open office. They are always there for me.*"
Analysis - Revisiting research questions

1. How might we develop an academic community amongst enrolled students?
   At the culmination of the course, 82% of the students surveyed stated that they interacted with fellow classmates for academic purposes outside of the EDUC 379 class.

2. How might we support the development of writing for enrolled students?
   - Progressive grading
   - Extensive feedback
   - Clear rubric

![Graph](attachment://average_grade_progression.png)
Analysis - Revisiting research questions, con't.

3. What is the role of EDUC 379 in the academic & social development of students?  
   This answer has not yet been determined.

4. How do the course features (study groups, guest speakers, challenging assignments, etc.) support/shape student's first year experience?  
   Male role models & the Focus on Black students' educational struggle resonated with students.
5. What is the impact of the course on student’s ideas/decisions about graduate school?
There is evidence that students enrolled in the course had an interest in graduate school. There continues to be a question over student-athletes plans for graduate school.

Racism continues to shape the day-to-day experiences of our students

- Dorm issues
- Racial slurs / Verbal attacks
- Stereotypes
- Selective dating
