Bloom's Digital Taxonomy and Collaboration.

In Drawing 3, Collaboration is included as a separate element as well as some elements being shared. Collaboration can take many forms (see above) and value of the collaboration can vary hugely. This is often independent of the mechanism used to collaborate. Also collaboration is not an integral part of the learning process for the individual, you don't have to collaborate to learn, but often your learning is enhance by doing so. Collaboration is a 21st Century skill of increasing importance and one that is used throughout the learning process. In some forms it is an element of Bloom's and in others its is just a mechanism which can be use to facilitate higher order thinking and learning.
