

Annual Report 2013-2014

On the Cover:

In 2013, University of San Diego Student Wellness authored the “University of San Diego Suicide Prevention” grant proposal and was awarded a \$300,000, three-year grant from the Substance Abuse and Mental Health Services Administration (SAMHSA). With this grant, USD has been able to: increase awareness of mental health concerns, suicide risk and protective factors; provide gatekeeper trainings to the USD community; enhance help-seeking behavior; and work towards sustainable environmental change on campus and beyond that promotes the overall health and wellness of the USD community.

#USDILY

During Mental Health Awareness Week (October 2014) campuses across the nation came together to increase awareness and reduce stigma around mental health. Through a collaborative effort between Student Wellness and Associated Students, students showed their support of mental health by writing inspirational messages to fellow classmates on USD I Love You (#USDILY) note cards and checking-in with a mental health professional for a free and confidential mental health screening. Student Wellness was able to connect with a great number of USD students and provide messages of hope and resources about anxiety, depression, substance use and abuse, and suicide.

Grant Staff pictured: Melissa Halter, PhD, Senior Director of Student Wellness and Principal Investigator; Stephanie Lynch, MA, Assistant Director of the Center for Health and Wellness Promotion; Jaime King Sense, MBA, Coordinator of Media and Outreach; Jessica Critchlow, MBA, Assistant Director of Student Wellness Operations; Diana Bull, PhD, Coordinator of Curriculum and Training.

PERERO LIFE

#USDILY

Dear Colleagues:

Over the past 10 years, the University of San Diego has made measurable progress in advancing its research enterprise. In Fiscal Year 2004, 56 proposals were submitted on behalf of the faculty. In Fiscal Year 2014, the number of submissions grew to 114. During the same period, active awards increased from 68 (\$16,415,857) in 2004 to 121 (\$30,917,103) in 2014.

Under the current directorship of the Office of Sponsored Programs and with the support of the Office of the Vice President and Provost, faculty members have substantially increased the level of sponsored activity. The Office of Sponsored Programs partnered with Accounting to manage the increasing load; OSP added two additional full time positions; post award financial management and disbursement moved to Accounting; and professional development opportunities for faculty expanded and collaborations have grown.

This publication shows our progress and highlights the research and intellectual pursuits of the past year. Thank you to the faculty and administrators for your dedication and effort on behalf of the University of San Diego.

Traci Merrill, CRA
Director

Mission Statement

The Office of Sponsored Programs (OSP) at the University of San Diego (USD) is committed to providing quality service and support to the University community. Our team partners with faculty, administrators, and graduate students, assisting them from concept development and identification of potential extramural funding sources, through proposal and budget preparation, to the submission of innovative, high-quality, competitive proposals. After an award, OSP supports the non-financial management of the award, culminating in the project closeout. We are committed to nurturing, facilitating, and supporting a growing research enterprise positioned to gain a standing among preeminent U.S. institutions.

“The relatively small space that USD occupies on our planet continues to make an uncommonly great impact on our world.”

~President Mary Lyons

Research Team

The OSP team’s highest priority is to continue to build and nurture relationships with members of the USD community so that mutually we can build strong proposals that result in external funding, and together, celebrate the successful growth of the University’s diverse programs.

One of the primary responsibilities of OSP is to stay up-to-date on many legal, governmental, organizational, and sponsor regulations and guidelines that affect compliance within a research enterprise. For this reason, OSP staff members participate in a variety of professional organizations in the field of research administration. OSP is currently a member of the following organizations:

- ◆ Inter-Mountain University Research Administrators (IMURA)
- ◆ The National Council of Research Administrators (NCURA)
- ◆ The National Organization of Research Development Professionals (NORDP)
- ◆ The Society of Research Administrators International (SRA International)

OSP also participates as members on the following USD committees in order to provide perspective and expertise:

- ◆ The Bond Compliance Committee
- ◆ The Institutional Review Board (IRB)
- ◆ The University Research Council

(Front) Traci Merrill, Director
(Back) Katie Bamburg, Grant Budget Specialist
Michelle Totoris, Research Development Officer
Karen Molenda, Grants Manager
Joanne Draper, Office Manager

Key Services Provided

Pre-award: Funding Searches, Proposal and Budget Development, and Submission

OSP's primary and most visible mission is to serve the University community in the successful pursuit of external funds to support research and campus programs. Our office collaborates with faculty through every step of the pre-award process to submit highly competitive proposals:

- ◆ Identification of external funding opportunities
- ◆ Interpretation and application of funding guidelines
- ◆ Detailed development of every element of the proposal and budget
- ◆ Compliance review to ensure requirements put forth by USD and external sponsors are met

Compliance, Contracts and Reports

Once an award is received, OSP is responsible for the following non-financial support activities:

- ◆ Negotiation, acceptance, and approval of grant/contract terms
- ◆ Set up of subawards and independent contractor agreements
- ◆ Closeout and retention of award data and documentation

OSP and Foundation Relations Working Together

External funding is critical to furthering existing research endeavors and initiating new avenues of teaching and scholarship. To meet these challenges, Foundation Relations (FR) and OSP staff members work together to lend visible and vital support to USD's applicants. Grant-seeking faculty and administrators benefit from an effective collaborative search process shared by FR and OSP.

OSP and Grants Accounting Coordinated Award Management

OSP and Grants Accounting work together to review administrative processes and timelines unique to each project. An initial transition meeting with the PI serves as a valuable resource that details the management of all awards and explains the roles and responsibilities of both departments.

Education and Outreach

OSP provides development sessions tailored to faculty, community partners, staff and students. A great deal of time is put forth educating and training members of the USD community. During fiscal year 2014, OSP Staff held numerous education and training sessions were held on a variety of topics including Pivot, Cayuse, and CITI as well as customized sessions on proposal and budget development.

New Faculty Guidance

Special efforts are made to welcome new faculty to USD and provide an introduction to pre-award services. In addition to attending the *New Faculty Orientation* and giving a brief introduction to OSP, our office, along with Foundation Relations (FR) and the Office of Undergraduate Research (OUR) schedules one-on-one meetings with new faculty members.

Professional Development Opportunities for Faculty New to Research

OSP recognizes the need to invest in individuals who are moving forward with new research goals. In the past year, OSP supported faculty professional development in order to promote skills associated with grant preparation. This year, faculty members were sponsored by OSP to attend the Council on Undergraduate Research (CUR) *Proposal Writing Institute Seminar* at the University of South Alabama and an NSF *Grant Writing Workshop* at UCLA.

Nurturing Collaboration

During the 2013-2014 academic year, OSP brought together researchers from various disciplines with similar topical interests. As a result, these groups of representatives from USD's scholarly community made substantive progress in advancing collaborative research. The momentum that began with these sessions continues as OSP staff partner with PIs across the campus to produce and submit collaborative research proposals.

Research Council

In fiscal year 13-14, OSP convened a group of faculty from all units across campus to participate as Research Council members. The council met once per semester to discuss various activities, policies and topics that impact university stakeholders. Direction received from the council was important in helping to inform OSP of faculty and leadership goals pertaining to research. A new council, with a slight change in membership, continues to meet and provide valuable guidance.

Outreach to Students – Future Grantees

The University recognizes the importance of educating and preparing students on the grant proposal development process. OSP staff members were invited to present in a number of undergraduate and graduate classes in which a variety of grant-related topics such as introduction to grant writing, elements of a grant proposal, and finding funding were discussed.

Tools and Resources

Electronic Research Management System (Cayuse)

Along with Harvard University, USD became a nationwide leader in the implementation of Cayuse, an electronic research administration system that has brought efficiencies and streamlining to the proposal development, routing, and submission process.

Pivot Database

OSP and Copley Library subscribe to Pivot, an innovative, on-line database where researchers can find funding opportunities from both the federal and private sector, and identify potential collaborators and scientists working in a particular field or area of research. Pivot offers individually-focused search services for external funding and identifies colleagues by a variety of characteristics.

Electronic Compliance Program

The CITI (Collaborative Institutional Training Initiative) Program is a service that provides training and tracking in Responsible Conduct in Research (RCR), Financial Conflict of Interest (FCOI), Human Subjects Research, and Lab Animal Welfare. OSP ensures that individuals working on research grants and contracts have complied with the specified training required.

Recognition

The first annual *Celebration of Scholarly and Creative Achievements* presentation and reception was hosted on April 23, 2014 by President Mary Lyons, OSP and Foundation Relations. This event was held to honor the 75 individuals who submitted proposals for external funding during the 2013 calendar year.

In spring 2015, the first annual Research Week @ USD will be hosted by the Offices of Sponsored Programs, Foundation Relations and Undergraduate Research. This event will celebrate the research accomplishments by faculty and undergraduate students in all disciplines. The goal is to raise awareness of recent funding efforts, to encourage faculty submissions to external sponsors, and to emphasize the value of philanthropic and research investment on campus.

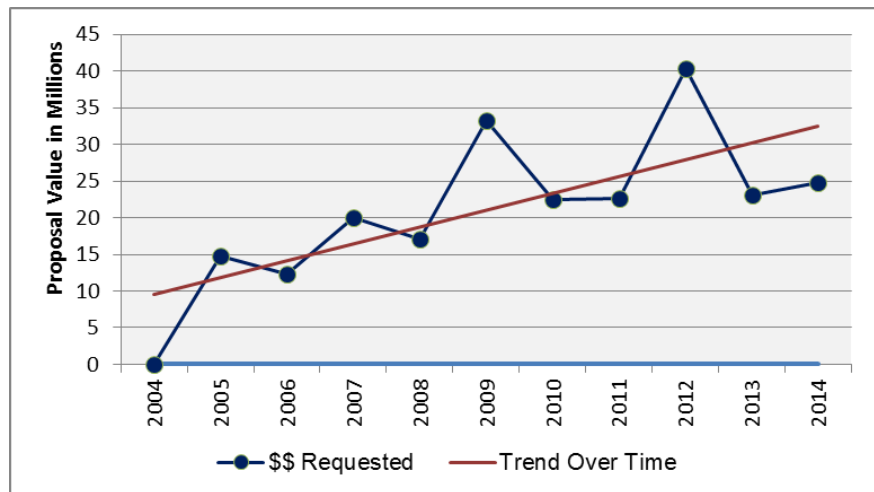

Annual Research Metrics for Sponsored Programs

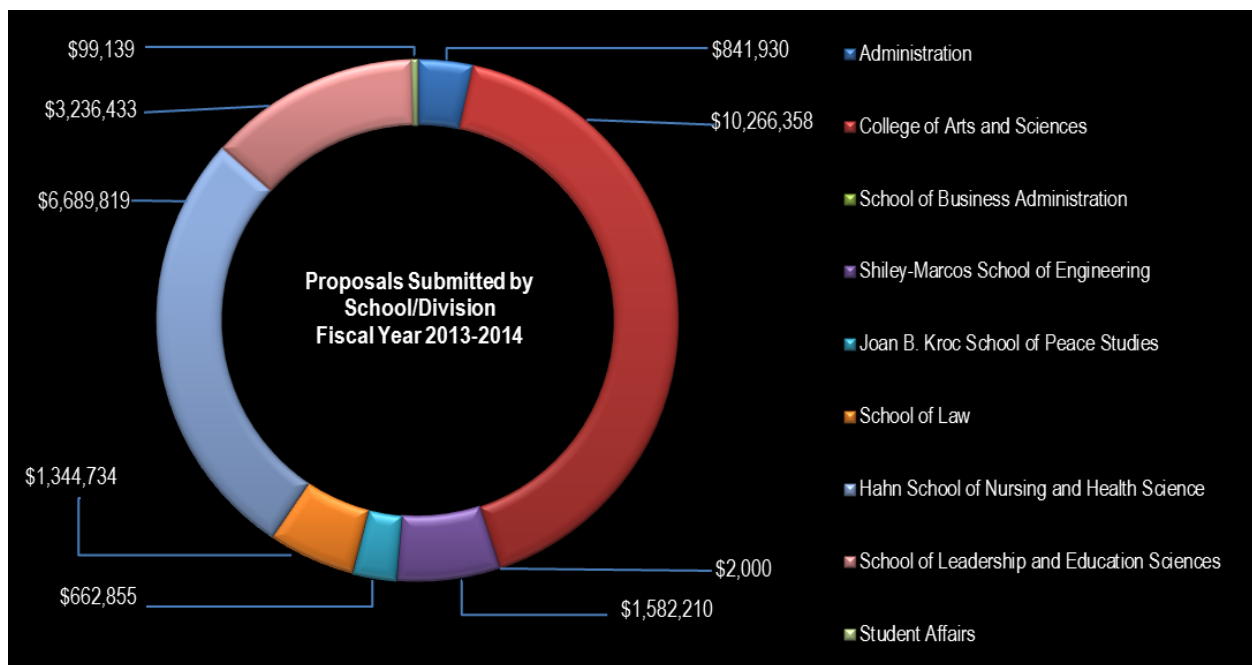

OSP has made significant progress in advancing the research enterprise at USD. The last decade of growth continued this past fiscal year as USD faculty and administrators submitted 114 proposals: 44 federal, 17 state/city, 50 private, and 3 international proposals. These submissions, which totaled \$24,725,478, included support for equipment, research, training, scholarship, and service.

Below, we present metrics reflecting the proposals submitted and awards received as well as the growth of OSP over the past 10 years.

Sponsored Programs Dollars Awarded, Fiscal Years 2004-2014

Awards by Schools and Divisions

2013-2014 Research Metrics: Fiscal Year Value for Sponsored Programs by Unit

Projects with multiple Investigators are listed in the departments of the Principal Investigator (PI) as well as in the department of each Co-Investigator (Co-PI).

In cases where the PIs are from different departments within the same college/school, an asterick (*) will appear after the name of each Co-PI.

When the PIs are from a different college/school, a double asterick (**) will appear after the name of the Co-PI.

NOTE ON COLLEGE/SCHOOLS TOTALS: Funded awards, for which there is Co-PI participation, are referenced in both PI and Co-PI departments. However, official college/school and departmental totals include only that of the lead investigator.
