## Alerts and Warnings

### Travel Warnings

We issue a Travel Warning when we want you to consider very carefully whether you should go to a country at all. Examples of reasons for issuing a Travel Warning might include unstable government, civil war, ongoing intense crime or violence, or frequent terrorist attacks. We want you to know the risks of traveling to these places and to strongly consider not going to them at all. Travel Warnings remain in place until the situation changes; some have been in effect for years.

### Travel Alerts

We issue a Travel Alert for short-term events we think you should know about when planning travel to a country. Examples of reasons for issuing a Travel Alert might include an election season that is bound to have many strikes, demonstrations, or disturbances; a health alert like an outbreak of H1N1; or evidence of an elevated risk of terrorist attacks. When these short-term events are over, we cancel the Travel Alert.

# ADMINISTRATIVE LAW

# A note about administrative law...

- Legislature passes a law, giving the broad strokes and “enabling” a government agency to implement the law
- To implement the legislature’s intent, the agency typically will have to do 2 things:
  1. Promulgate regulations that provide more detailed rules & establish oversight processes;
  2. Enforce the law through those processes, including administrative hearings/adjudications
- These regulations & adjudications are generally referred to as “administrative law”
- Administrative law makes up a huge portion of “the law”

# Administrative law

# Relevant documents & where to find them

- The “enabling” legislation instructing agency to promulgate regulations – session law (Congress.gov)
- Agency drafts & publishes proposed regulations in the Federal Register (Fed. Reg. or F.R.) (FDsys)
- Opportunity for public comment (regulations.gov)
- Agency drafts & publishes final regulations in the Federal Register (Fed. Reg. or F.R.) (FDsys)
- Codify the final regulations in the Code of Federal Regulations (C.F.R.)(FDsys)
