Reliable sources

- Evaluate sources for:
  - **Authority** – author is identified, reputable, credentialed
  - **Objectivity** – fairness and lack of bias
  - **Accuracy** – provides references to sources, verifiable
  - **Scope** – relevant to your topic and argument
  - **Currency** – may vary by topic, but make sure you know the current state of thinking in your field (even if it's rooted in older writings)

AI Litigation Database

This database presents information about ongoing and completed litigation involving artificial intelligence, including machine learning. It covers cases from complaint forward – as soon as we learn of them – whether or not they generate published decisions. It is intended to be broad in scope, covering everything from algorithms used in hiring and credit and criminal sentencing decisions to liability for accidents involving autonomous vehicles. It also includes some cases concerning statistical analysis and data protection that may not directly involve artificial intelligence, but that are of particular relevance to AI projects. It includes cases addressing whether AIs can be authors of works protected by copyright law, or inventors of inventions protected by patent law, but it does not include litigation concerning patents that may involve artificial intelligence or machine learning.

Because some search engines have a difficult time indexing pages that incorporate dynamic content served from another server, the table displayed below is static, and represents the database contents as of October 10, 2022. The dynamic database, complete with search form, can be accessed here. If you know of AI litigation that you don't see documented in the database, or if you have other suggestions, please tell us, using this contact form. Research and writing: GW Law students Jenna Fattah, Allie Schiele, Junhao Chen, Sydney Huppert, Zoe Kim, and Molly Brown, and Prof. Robert Brauneis. Implementation of the database on the Caspio platform: GW Law students Ji Wang, Sean Zhao, and Sydney Huppert, and Prof. Robert Brauneis. This database is based on work supported in part by the Institute for Trustworthy AI in Law and Society (TRAILS), which is supported by the National Science Foundation under Award No. 2229885. Any opinions, findings, and conclusions or recommendations expressed in this database are those of the author(s) and do not necessarily reflect the views of the National Science Foundation.

About Us

GW Law has received grants from New America's Public Interest Technology program to advance the public good in digital technology.

Ethical Tech@GW is an interdisciplinary collaboration where law meets computer science and engineering, media and public affairs, and social entrepreneurship. This initiative aims to examine the values that digital technologies implicitly embody and reflect, and the values that they should be built or redesigned to support. Through the initiative, we bring in guest technologists and other experts to interact with faculty and students, lecture and participate in expert roundtables on issues such as access to justice for marginalized communities, reproductive data privacy post-*Dobbs*, social media manipulation through mis/disinformation, and the values implicit in algorithmic decision making. We have launched a research project with colleagues from the School of Engineering and Applied Sciences and the School of Media and Public Affairs on the efficacy of a variety of methods for combatting mis/disinformation. Student researchers from GW Law and other graduate-level programs are deeply engaged in this interdisciplinary work by organizing expert roundtables, studying and analyzing fact checking and labeling of mis/disinformation communications on social media, and studying algorithmic fairness and bias issues.

More description of the project is presented by Ms. Kristen Mitchell of GWToday.

Amgen Patent Ruling's Impact Extends Beyond Life Sciences

Although the U.S. Supreme Court's decision in Amgen v. Sanofi may appear on its face to only affect life sciences technologies, it should change the way enablement is approached in other areas like chemicals, artificial intelligence, and mechanical and electrical, say attorneys at Haynes Boone.

Best Ad Practices For Digital Products Amid FTC Scrutiny

The Federal Trade Commission recently signaled an increased focus on content ownership claims related to digital products, especially those generated by artificial tools — so now is the time for companies to consider practical applications of decades-old consumer protection principles within today's digital context, says Ioana Gorecki at Kelley Drye.

Companies Must Dig Up Old Laws To Stay Privacy-Compliant

Despite the recent focus on new privacy and data security laws, companies cannot ignore existing rules that have recently been revived, amended or reinterpreted to address emerging privacy and data security challenges, says Julia Kadish at Sheppard Mullin.

Despite Regulation Lag, AI Whistleblowers Have Protections

Potential whistleblowers at companies failing to comply with the voluntary artificial intelligence commitments must look to a patchwork of state and federal laws for protection and incentives, but deserve comprehensive regulation in this field, say Alexis Ronickher and Matthew LaGarde at Katz Banks.

Deepfakes Pose 'Real Risk' to Financial Markets: SEC's Gensler

Artificial intelligence's ability to generate deepfake content that easily fools humans poses a genuine threat to financial markets, the head of the Securities and Exchange Commission warned.

Regulate AI? Here's What That Might Mean in the US: QuickTake

The US government doesn't have a great track record of keeping up with emerging technology: Look no further than Washington's stumbling attempts to oversee social media. But the complex new field of artificial intelligence raises legal, national security and civil rights concerns that would-be government regulators can't ignore. Even ChatGPT creator Sam Altman came out in favor of "regulatory intervention by governments" to "mitigate the risks" of AI. As Congress debates whether and how to impose binding regulation, President Joe Biden has called on leading AI companies to meet voluntary transparency and security standards as a first step.

1. US Biometric Storage System Protections Need Work, Watchdog Says (09/12/2023)

TOPIC federal agency budget, national security, digital privacy, data breaches, biometrics

DHS' new biometric identity management system—used to inform immigration and national security decisions—is expected to retain the fingerprints and facial scans of hundreds of millions of individuals. But the program doesn't align with several privacy requirements for federal agencies handling private data, the GAO report found. The government watchdog's findings come as DHS plans to increase storage capacity and broaden the biometric data it collects to include categories like DNA with the revamped system.

Conducting a Thorough Literature Review

Literature Review

- A survey of books, scholarly articles, and any other sources relevant to a particular issue, area of research, or theory

- Helps you formulate your thesis and locate your arguments within the larger field of study

- Also serves as a **preemption check** [Note: someone may have already written about your general topic, but you want to try to find a new (novel) angle on it.]

Literature Review: Sources

- ❑ Books
- ❑ Law articles
- ❑ Articles from other academic disciplines
- ❑ News/blogs
- ❑ Working papers & forthcoming articles (SSRN and Bepress)

Remember

- Evaluate sources for:
  - **Authority** – author is identified, reputable, credentialed
  - **Objectivity** – fairness, lack of bias
  - **Accuracy** – provides references to sources, verifiable
  - **Scope** – relevant to your topic and argument
  - **Currency** – may vary by topic, but make sure you know the current state of thinking in your field (even if it's rooted in older writings)

Search strategies

- **Use multiple search techniques**
  - keyword (natural language & Boolean)
  - subject
  - browse
- **Build from the sources you've already found**
  - look at sources cited by those sources
  - use a citator (Shepard's or KeyCite) to find sources that have cited to sources you've already found
- **Ask a librarian!**

Read the footnotes!

Footnotes

a1 Professor of Law, Seton Hall University School of Law. Email: bernstga@shu.edu. This Article was selected for the 2009 Stanford-Yale Junior Faculty Forum. The author would like to thank for helpful conversations and insightful comments on different drafts of this Article: David Barnes, Derek E. Bambauer, Kathleen Boozang, John Cross, Shay David, Shubah Ghosh, Scott Hemphill, Rachel Godsil, Paul Heald, Thomas Healy, Stephen Lubben, Dotan Oliar, David Opderbeck, Frank Pasquale, Amit Solomon, Charles Sullivan, and Jonathan Zittrain. In addition, thanks for excellent research assistance go to: Lindita Bresa, Anthony Dibenedetto, Monica Kostrzewa, Kelly Lloyd, Abigail Nickerson, Evan Rosenberg, Joseph Shapiro, Peter Slocum, and Caitlin Thistle. Special thanks go to Joseph Farano for his invaluable work on the empirical study. In addition, the author would like to thank the participants of the following conferences and colloquiums for their very helpful comments: The Standford-Yale Junior Faculty Forum, The May Gathering at the University of Virginia School of Law, the Information Society Project Colloquium at Yale Law School, the Intellectual Property and Communications Workshop at Michigan State University School of Law, the Seton Hall University School of Law Faculty Retreat, the Faculty Workshop at Syracuse Law School, the Society for Evolutionary Analysis of Law, Indiana Bloomington School of Law, the Telecommunications **Policy** Research Conference at George Mason Law School, the Intellectual Property Colloquium at Brooklyn Law School, the Faculty Workshop at Arizona State Law School, the Intellectual Property Scholars Workshop at the Hebrew University Faculty of Law, and the Work in Progress Intellectual Property Colloquium at the University of Pittsburgh Law School. Finally, this Article was generously supported by the summer research stipend of Seton Hall Law School.

Avoid “link rot” in your own citations

SIDEBAR

In Supreme Court Opinions, Web Links to Nowhere

By Adam Liptak

Sept. 23, 2013

WASHINGTON — Supreme Court opinions have come down with a bad case of link rot. According to a new study, 49 percent of the hyperlinks in Supreme Court decisions no longer work.

This can sometimes be amusing. A link in a 2011 Supreme Court opinion about violent video games by Justice Samuel A. Alito Jr. now leads to a mischievous error message.

"Aren't you glad you didn't cite to this Web page?" it asks. "If you had, like Justice Alito did, the original content would have long since disappeared and someone else might have come along and purchased the domain in order to make a comment about the transience of linked information in the Internet age."

Avoiding link rot

NOTE-TAKING TOOLS & AVOIDING PLAGIARISM

Why good note-taking is important

- Cite to the best sources to develop and bolster your argument
- The first step in avoiding plagiarism and giving proper documentation is to cultivate good note-taking habits.
- If you cut & paste text from another source to look at later, **immediately** mark it as copied text & include citation info

Tools that can help

- There's no one right way to do it. Pick a method that works for you and be consistent.
- There's an app for that. Actually, there are MANY apps for that.…

Comparison of these tools: https://guides.lib.berkeley.edu/publichealth/citations

Document and citation management

zotero

MENDELEY

RefWorks

Typical features include:

- Free or premium upgrade
- Web, client, mobile apps
- PDF storage & annotation
- Cloud & local storage
- Web content capture

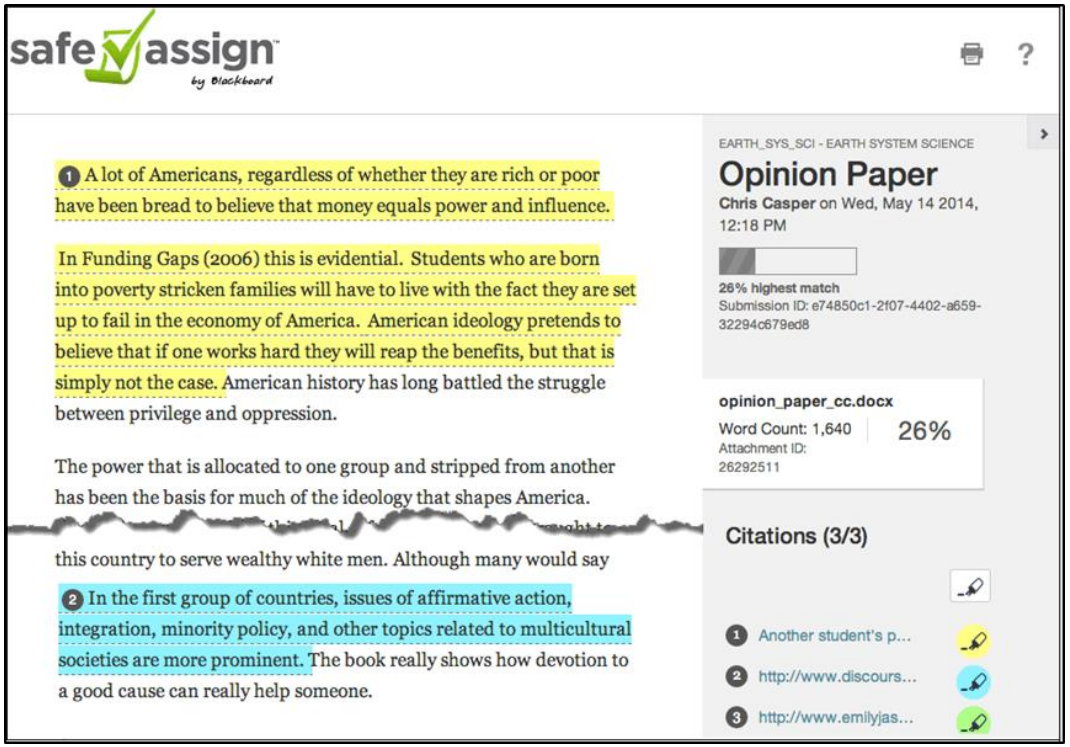
SafeAssign

- SafeAssign is an area in Blackboard where students can submit drafts of papers to check for possible instances of plagiarism before they submit final drafts to their course instructors.
- SafeAssign is FREE to USD students.
- Papers submitted through SafeAssign will not be saved in its database and will not be distributed to instructors.
- For more instructions, see the SafeAssign section of our Paper Writing for Seminars and Student Comments research guide.

How to use SafeAssign at the LRC

- Email mabernathy@sandiego.edu to be added to the Legal Research Center Organization
- When you are ready to submit your paper, login to Blackboard at https://ole.sandiego.edu/ultra/organizations and click on the Legal Research Center under the Organizations tab
- Click on Organization Content
- Click on View Assignment
- Upload your document
- Wait for an Originality Report

Originality Report



SafeAssign compares submissions to other texts (journal articles, student papers, internet sources)

Creates an Originality Report

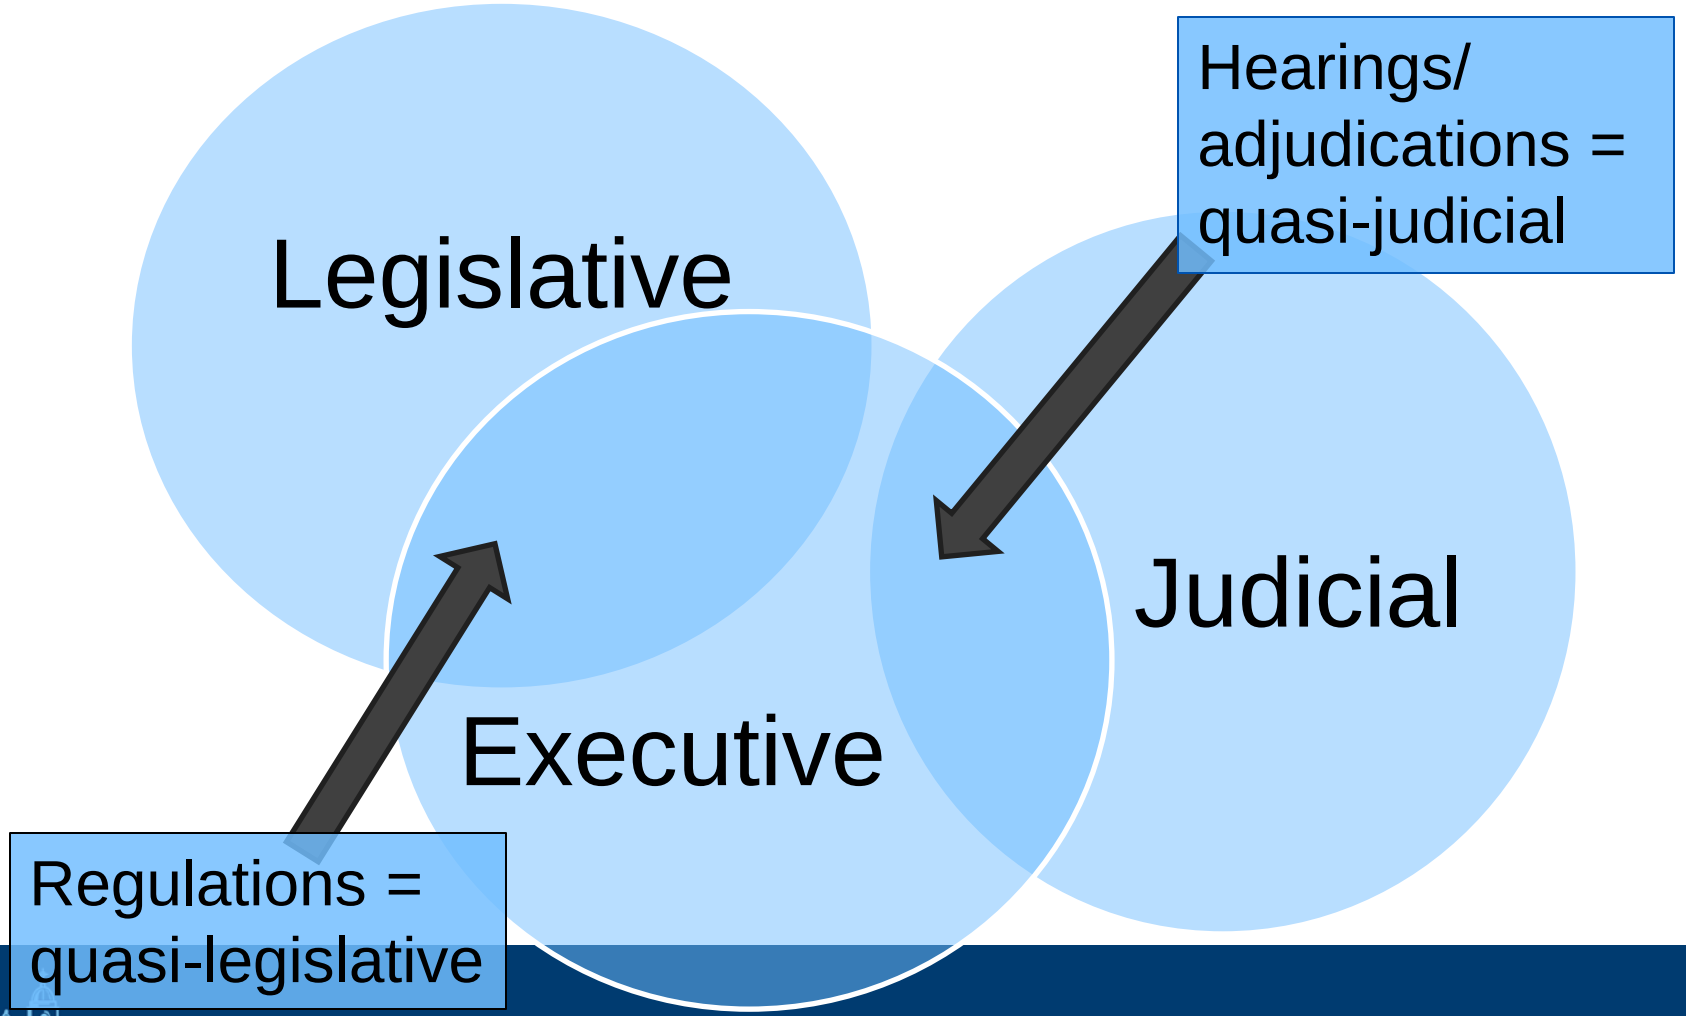
SafeAssign does not automatically detect plagiarism.

It is up to you to interpret the meaning of the report.

Understanding your Originality Report

Administrative Law

Administrative law



Promulgating regulations

- Agency drafts proposed regulations
- Publish proposed regulations in the Federal Register (Fed. Reg. or F.R.)
- Opportunity for public comment
- Agency drafts final regulations
- Publish notice of final regulations in Federal Register
- Codify the final regulations in the Code of Federal Regulations (C.F.R.)
